

Make your own Fragrance Soap!

What you need:

- **EssenEx® 100 Distillation Kit**
 - o Fragrance botanical material you wish to use – (lavender, Juniper, etc.)
- “Melt-and-Pour” soap (available at craft and hobby stores)
- Glass heat-resistant container (the beaker from the EssenEx® Kit, for example)
- Plastic or Silicone soap bar molds (or-wax-paper lined small cake pan)
- Dye concentrates (if you wish to have a color to the soap)
- Pot or ceramic dish (for hot water to heat glass container)
- Wooden Spoon
- Scale (optional)

Preparation:

- Select fragrance desired and extract the essential oils from the plant material.
 - o Start with one extraction run of oil for one batch
- Select quantity of melt –and-pour soap for batch
 - o 1 or ½ pound (225-450 grams) is an easy size to consider for a first run
 - The beaker holds 225 grams reasonably well....
- Place all materials in a convenient space, such as a kitchen counter.
- Make an appropriate portion of the dye based on its instructions and your preference

Trial:

- Add 2 cups of water to the pot and bring to a light boil
 - o One easy way is to use a ceramic dish in your microwave!
 - Or go ahead and use your stove with a soup pot.
- Place glass container (beaker) in the water bath
 - o Add melt-and-pour soap
 - Stir occasionally with wooden spoon until melted
 - o Add essential oil and dye concentrate
 - Mix thoroughly until color is consistent or as desired.
 - o Pour soap into molds and let cool at room temperature over night.
 - o Remove and Enjoy!
